

ENERGY POLICY

We are committed to developing functional products based on carrageenan, alginates, fibers, and other gums obtained from sustainable natural sources:

- By incorporating resource conservation and energy efficiency into production processes.
- Ensuring all necessary resources for the continuous improvement of energy performance, including the availability of information.
- Ensuring compliance with legal and regulatory requirements related to energy efficiency.
- Supporting the incorporation of energy efficiency concepts in equipment, systems, and services during both design stages and acquisition and/or contracting, maintaining interactive communication with our suppliers, distributors, and customers.
- Ensuring that our staff receives optimal training to perform their duties, covering all aspects related to the Integrated Management System.
